Playground Safety Matting	MasterPlay	MasterPave / Tile	MasterMulch
Did you know that 90% of playground structures are considered unsafe? And it's largely due to inadequate and poor surfaces. A five-year review of playground equipment undertaken by the Red Cross Children's Hospital showed 1 405 injuries, of which 60% were falls that had occurred in public places, including schools. Of the children injured, 32% are between 1 and 4 years and 53% between 5 and 9 years. Fractures account for 41% of injuries.	Application Public Playgrounds, Hospitals Large - Medium Schools Large to medium after care/crèches Private Houses/Complex Were budget allows	<u>Application</u> Medium - Small Schools Medium – Small after care/crèches Private Houses/Complex Were budget allows	<u>Application</u> Medium - Small Schools Medium – Small after care/crèches Private Houses/Complex
